

Listingi programów

LISTING 1 - "Hello World" - miganie diodą

LISTING 2 - GPIO wejście + Serial

LISTING 3 - ADC + Serial

LISTING 4 – Czujnik temperatury i ciśnienia BMP180

```
#include <qbcan.h>
BMP180 bmp;
void setup() {
  Serial.begin(9600);
  // Inicjalizacja sensora
  if (bmp.begin()) {
    Serial.println("BMP180 init success");
  }
}
void loop() {
  // Deklaracja zmiennych na temperaturę i ciśnienie
  double T, P;
  // Odczytaj dane z czujnika
  bmp.getData(T,P);
  // Wyjślij dane przez Serial port
  Serial.print("Absolute pressure: ");
  Serial.print(P,2);
  Serial.println(" mb.");
  Serial.print("Temperature: ");
  Serial.print(T,2);
  Serial.println(" deg C.");
```

LISTING 5 - Hello radio - nadawanie

```
//Include the required libraries
#include <qbcan.h>
//Radio Parameters
constexpr int NodeID = 2;
constexpr int NetworkID = 100;
constexpr int TargetID = 1;
//Radio object
RFM69 radio;
void setup()
{
  //Initialize serial connection for debugging
  Serial.begin(9600);
  Serial.println("REBOOT");
  delay(1000);
  //Initialize radio
  radio.initialize(FREQUENCY, NodeID, NetworkID);
  radio.setHighPower();
  radio.setFrequency(433000000);
  Serial.println("Transmitting at 433 Mhz");
}
```

```
void loop() {
   radio.send(TargetID, "CanSat 2017 ESERO-PL", 20);
   Serial.println("Packet sent!");
   delay(500);
}
```

LISTING 6 - Hello radio - odbiornik

```
//Include the required libraries
#include <qbcan.h>
//Radio Parameters
constexpr int NodeID = 1;
constexpr int NetworkID = 100;
//Radio object
RFM69 radio;
void setup()
{
  Serial.begin(9600);
  Serial.println("REBOOT");
  delay(1000);
  //Initialize radio
  radio.initialize(FREQUENCY, NodeID, NetworkID);
```

```
radio.setFrequency(433000000);
  radio.setHighPower();
  Serial.println("Listening at 433 Mhz");
}
void loop() {
  if (radio.receiveDone()) {
    Serial.print("Packet received: ");
      for (byte i = 0; i < radio.DATALEN; i++) {</pre>
        Serial.print((char)radio.DATA[i]);
      }
    Serial.println();
    Serial.print("RX_RSSI: ");
    Serial.println(radio.RSSI);
  }
}
```

LISTING 7 – Wysyłanie danych z czujników

```
//Include the required libraries
#include <qbcan.h>
//Radio Parameters
constexpr int NodeID = 2;
constexpr int NetworkID = 100;
constexpr int TargetID = 1;
//Radio object
char payload[100];
RFM69 radio;
BMP180 bmp;
void setup()
{
  //Initialize serial connection for debugging
  Serial.begin(9600);
  Serial.println("REBOOT");
  if (bmp.begin()) {
    Serial.println("BMP180 init success");
  }
  delay(1000);
```

```
//Initialize radio
  radio.initialize(FREQUENCY, NodeID, NetworkID);
  radio.setHighPower();
  radio.setFrequency(433000000);
  Serial.println("Transmitting at 433 Mhz");
}
void loop() {
  double T, P;
  bmp.getData(T,P);
  char payload[100];
  long int P_int = P*100;
  long int T_int = T*100;
  sprintf(payload, "P: %ld T: %ld", P_int, T_int);
  radio.send(TargetID, payload, strlen(payload));
  delay(500);
}
```
